# CONTROL PANEL BUILDING

*Turnkey control panel solution, with expertise to fit your specific application needs.*

**Control systems can be complex, and are successfully executed when a customer needs are understood. We have the team of experts to take your project from design to implementation.**

## OUR SOLUTIONS CENTER

As a dynamic facility and engineering hub, our knowledgeable and experienced team is committed to providing their expertise with assembly, enclosure modifications, controls engineering, and other services to support your needs. Whether we become an extension of your team or a full-service solution, our team is ready to deliver exceptional results.

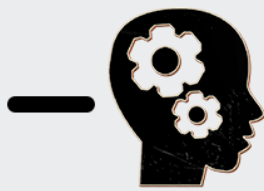

## CONTROL PANEL SOLUTIONS

*Our Engineers can offer a turnkey control panel solution, with expertise to fit your specific application needs.*

### Our Control Panel Building Process:

Evaluate needs  
& details

Develop concept  
including product  
specifications

Customer review  
& authorization

Engineers create  
electrical prints

Assemble, test,  
& ship panel

We offer control panel building & design including when UL508A certification is needed. Our abilities range from OEM control panels to basic custom control panels to more complex control panels.

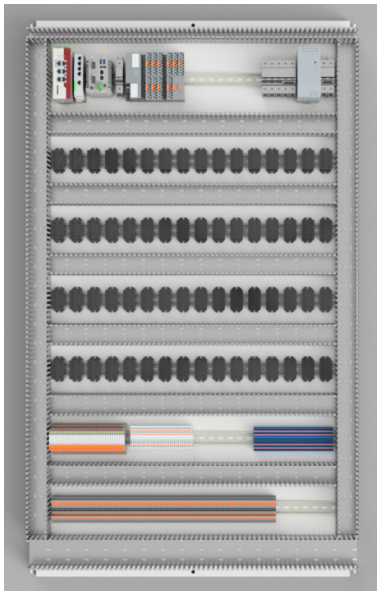

## Our Approach

We apply our knowledge of the latest products into a design to help optimize your efficiency, productivity and profitability all while minimizing your total cost of ownership. Our approach is to create a *partnership for your success*.

VFD Control Panel- 3D Enclosure Layout

PLC Control Panel- 3D back panel layout

## Capabilities

- Controls Engineering
- Product Assembly
- Electrical Prints/schematics
- Labeling & Testing
- Custom & OEM
- UL 508A Certified
